About This Game

Many myths and legends have been woven about the Arabian Peninsula. One of these legends tells of Iram, City of Pillars, and its exceptional destiny.

Being the heir to the throne you lived a life of splendor and never worked one day of physical labor – until one day, the winds of fate turned.

Days passed and the storm did not fade, if anything its strength and ferocity only grew. You would do anything to bring back only a spark of your mother's joy. And so, one night, when the kingdom sleeps and the moon smiles, you embark on a journey ...

Caravan combines strategy with RPG elements resulting in a trading and exploration game packed with suspense and challenges.

In a pre-medieval Oriental setting players will send their caravan from town to town. On their way, they will experience dangerous, mystical adventures, embark on rewarding quests in towns, and fight against dangerous bandits, beasts, ghoulish creatures and djinns.

- Genre-Mix: diverse gaming experience through a mix of strategy, trade, and RPG elements
- Players manage their own caravan
- Setting based on history and geography of the Orient
- Cultural authenticity through regional folklore and stories of the ‘Arabian Nights’

Title: Caravan
Genre: Adventure, Indie, Simulation, Strategy
Developer:
it Matters Games
Publisher:
Daedalic Entertainment
Release Date: 30 Sep, 2016

a09c17d780

Minimum:

OS: Windows Vista SP2

Processor: 2.2 GHz Dual Core CPU

Memory: 2 GB RAM

Graphics: ATI Radeon HD 3400 Series, GeForce 8600 GS

DirectX: Version 9.0c

Storage: 400 MB available space

Sound Card: DirectX 9.0c Compatible Sound Card with Latest Drivers

English, German, French, Japanese, Korean, Russian, Simplified Chinese, Turkish

Bought EEP 12 in the winter sale and then found EEP Train Simulator Mission. I am a native English speaker and right off the bat, the instructions could do with someone with a better understanding of English. I guess the dev's are German and while the menus are ok to understand they could be a lot easier for us non Germans.

I am enjoying the tutorials I have played so far. Though I seem to have missed the keyboard commands for the main engine controls.

I have had no issues with the game not starting, the latest build for me, has been easy to setup and play. One thing I am unsure about is the editor, when I click the button in the main menu, it takes me to the EEP 13 shop, so I am guessing to edit you will need a copy of EEP. I have EEP 12 which I hope you can use that editor.

A bargain for 34.99 and the dev's updating regularly, I would recommend to anyone with a train interest and some time to learn the controls.. The dev of this game did really try to make something real here.

There's been some level of attention for details and everything basically works.

However, there must be thousands of this kind of games by now and many of them are free to play.

The lack of originality, puzzle skill and depth make this game not worth the money.. An enjoyable piece of casual fun - but you still have to think your way through.

Don't know that I will play for too long, but the leaderboard is keeping me focused at the moment.. A cute puzzle game, yet it lacks the addicting nature that most matching games tend to. There's barely a semblance of story [though not most puzzle games have such], and it only progresses after you've played about... oh, 40 matches for each stage. Each stage has about 8 levels or so, and each level has 5 rounds to it. Because of this lack of progress being felt, it gets more tedious than other matching puzzle games do. It does have a bit of uniqueness to it, in that the matching gimmick is based off square or rectangular shapes; rather than moving pieces around to make a match nearby, you have to search for four corners in order to make a match. The music, while adding to the cute theme of the game, doesn't really have any memorable traits to it, and the music for when time is running out is kind of annoying more than adding to the rush factor. Transition between rounds is slow, for a matching game that includes a time limit. This adds to the feeling of slow progress, as well as the 40 rounds one must go through in order to see the next piece of the "story" that is meant to tie the game together. Since it's a puzzle game, I won't go on about the little bit of story that I've played through, other than that it's just there for show and doesn't add to the game experience.

There's just something missing from this game that makes it as addicting as other matching games. Perhaps the lack of a falling chain/combo, like other matching games have. Where more traditional matching puzzle games have new pieces fall in from above, this one just has them reappear. And since you have to click on the corners in order to make a match, there's some fun missing in having matches just suddenly cascade into a nice combo that completes the level.

Overall, if you don't care much about puzzle games and you find it on sale or in a Humble Bundle, I'd say go for it. But if you like the addicting nature of matching puzzle games, then I would pass on buying it unless you absolutely run out of other games to play or try.. Pros:

--> Really easy to use

--> Great if you want to get started with music recording

Cons:

-
- >You can't do anything beyond basic tasks such as recording or midi editing.
 - >Lacks flexibility.
 - >Doesn't have necessary features (like sidechaining).
 - >Built in effects are not that good.
 - >There is nothing that differentiates this from other recording software.
 - >Minimal support and the community is almost non-existent.
 - >Dated interface.

Verdict:

Although the software is nice, I don't think it justifies the price. There are other free alternatives that have more features than this. (like audacity, lmms, cakewalk by bandlab). Honestly, I wouldn't recommend this because you can do way more with the software I mentioned above (which are free). I wish I could get a refund.... Pretty cool old-skool style game.. Its hilariously bad. Its so bad I actually recommend it for people to see how bad it can really be. Seriously.. Incredibly simple, it'll entertain you for 3 minutes tops.. I bought this game in I don't know 2001 and it was a blast and a real challenge for a 17-18 year old gamer to play these missions without "swatlord" ;)

Got this game back in 2017, I still love it. It has some realistic "police-work" aspects (calling in suspects on the radio, procedures, rules of engagement, just killing) simulation aspect and I still enjoy playing it with the GOTY upgrade. GREAT GAME, probably one of the best tactical shooters.

It supports 3440x1440! I bought the bundle which included this game. The reason I bought the bundle was for Hegemony Rome but this ended up being the better game imo even though it's older. The only things I didn't like were the jerkiness when zooming in/out with the scroll wheel, the WASD keys not being the default keys for panning and the occasional snap/crackle sound bug. It's like Grand Ages: Rome (same devs) except it doesn't crash all the time. The number of campaigns and scenarios in this game will keep you busy for a very long time.. I hate having to not recommend this title but it did not live up to expectation. The snapshot of the voyage was very brief, no showing of the ship before sinking, no showing the ship hitting the iceberg and a greatly accelerated rendition of the sinking which was a bit sterile and the graphics too basic.

I love what they have tried to capture with sitting in the lifeboat which was well done but it was just not enough.

The majority of the game is exploring the wreck 100 years later with a basic mini game. While this was a nice addon I personally would have preferred for the focus to have been on the voyage and the sinking itself.

After Apollo 11 I had great hopes for this title especially when I heard there would be real actors however it did not live up to what I was expecting. I would not pay for the title given the chance again and think it would be better suited as a subscription play.. Saw that this software had mixed reviews, simply recommending it because it deserves a higher rating.

Since Windows 8, the start menu has been\2665\2665\2665\2665\2665\2665 I used to use classic shell to replace the menu, but now I use Start10 because I only wanted the start menu modified. Works the same way as the old start menu while looking nicer.

An added benefit is skinning the taskbar, which I've made to look like Windows XP. Which is well complemented by the classic 'bliss' wallpaper.

Other people seem to be complaining about activation not work. I'm not saying it doesn't happen, but I've never had that issue and I've installed the software on multiple laptops and desktops running various Windows 10 versions.. Don't buy this game. Buy ATS or ETS2. I know this was a before ATS or ETS2 but playing the game back in the day was fun. But now its not.. If you're an artsy, audiophile gamer it's pretty much the best thing ever.. Lot's of love and thought put into the systems behind this indie game. It's also fun to play. Which is nice.

6.97V10.019. Golden oldie.. <https://www.youtube.com/watch?v=6BS7LJ8GHCI>
